2. Joomla!

Joomla! is one of the biggest rivals of WordPress.

The community for Joomla! is very active and there are over 7,000 Joomla! extensions. You can find an extension for just about anything and *there are lots of themes* to choose from.

The biggest stumbling block about Joomla! is that you'll need to pay for most plugins and themes.

But it's still a *very good CMS*.

Come Sail Away with Me

Individually, we are one drop. Together, we are an ocean.

On morning the bright sun rises from the horizon over the mountains of the ocean. They follow the path of lightness and their play with the sea is like a never ending process. We have chosen the best of the sea's gifts. Finally, at the end of the day, a great host of sensations and surprises. On the rare clear evenings when the moon is out, against the setting of the gulf.

The screenshot shows a Windows desktop environment. At the top, there's a taskbar with several pinned icons: File Explorer, Microsoft Edge, PDF, Mail, Photos, OneDrive, Word, Excel, Powerpoint, and a few others. Below the taskbar is the Start button and a search bar. The main area of the screen is occupied by a Firefox browser window. The address bar in the browser says 'localhost/wordpress/'. The page content shows a single post with the title 'Hello world!' and the date 'AUGUST 27, 2019'. The post content reads: 'Welcome to WordPress. This is your first post. Edit or delete it, then start writing! Welcome Friends in TechnoguruAmit Channel.' Below the post, there are author details: 'admin' and 'Uncategorized'. The bottom right corner of the browser window has a 'SAMPLE PAGE' link. The system tray at the bottom right shows the date '08-09-2019', the time '11:44', and a battery icon. The status bar at the bottom left shows 'Transferring data from localhost...' and the number '05:18'.
